

InfoPrint 6500 Cartridge Ribbon Feature Highlights

- New ribbon system provides “clean-hands” technology to InfoPrint line printers
 - Ribbon welded to form a continuous Mobius loop (push+pull through cartridge): ribbon is regularly flipped during operation utilizing both side of the ribbon without manual operation
- New ribbon system helps for less downtime with...
 - Less operator cleaning
 - Increased machine availability time with faster ribbon change
 - Extended life cartridges will have longer life than spool ribbons requiring fewer operator interventions over time

InfoPrint 6500 Cartridge Ribbon Feature New Ribbon Yields

- Facilitates an easier comparison against laser
- Better indicator of actual print life for the end user

Old specification

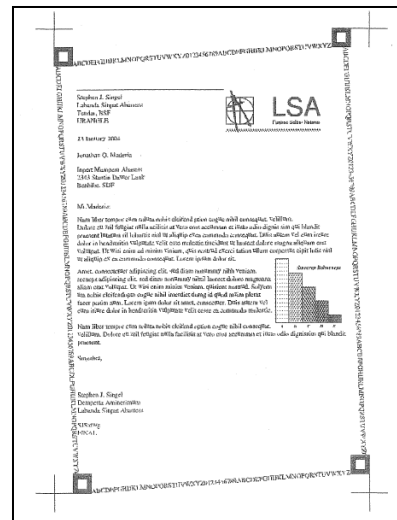

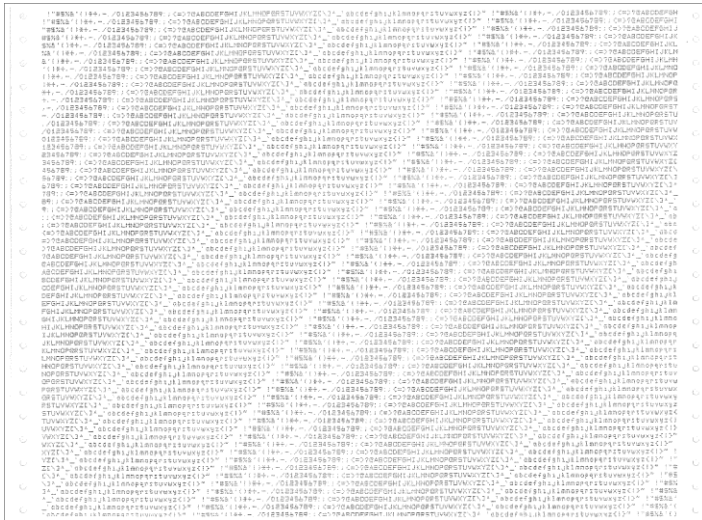

Based on draft mode printing – almost never used in real applications

Unrealistic print pattern – it didn't duplicate the real stresses of a typical application

New specification

Based on data processing mode printing – default and most popular

Used similar test pattern as ISO 19752 test page

New Specification

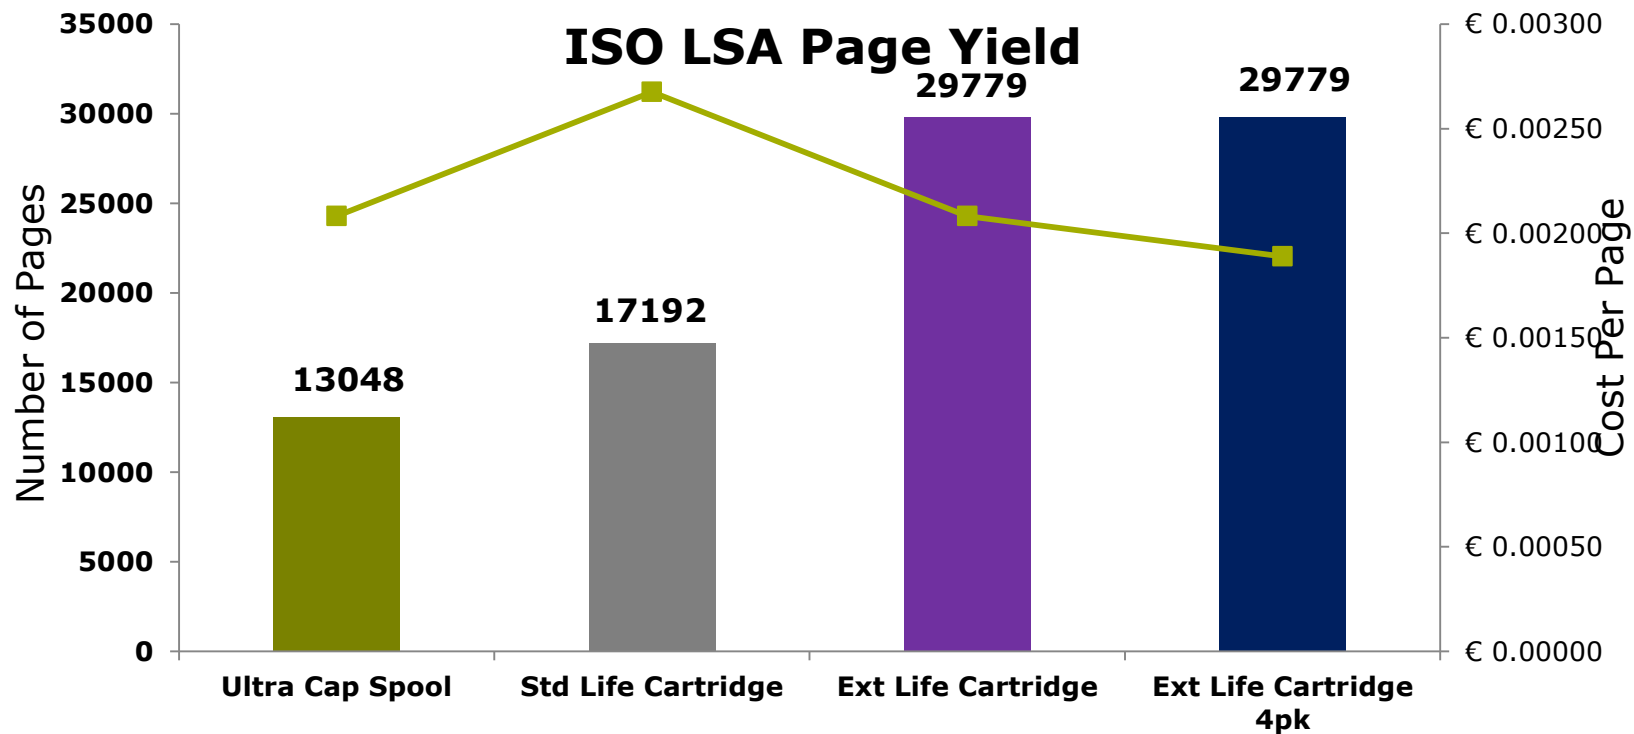

- 8.5" x 11" – Letter size
- DP print density
- Test pattern similar to **ISO 19752** test page
- Counts pages printed

Old Specification

- 11" x 14.5"
- High Speed Draft density
- Shift Recycle pattern
- Counts every letter, punctuation and symbol
